Locarno, september 2024

Throughout the many years, the Committee of the Chaba Adoption Agency has always given time to reflect on its work, giving special attention to the ethics of the service provided.

International adoption in recent years, having been influenced by multiple social, political and legal factors, is going through a great many changes. Receiving and sending countries are constantly implementing new policies in the adoption procedure. All these transformations, which will lead to a new way of interpreting and proposing adoption, imply a great deal of work and a questioning of the role of all those involved, including that of the intermediary.

The Chaba Adoption Agency Committee, after deep reflection, has therefore decided to end its activity as an intermediary. This closure will take place only when all families under contract with Chaba Adoption Agency have completed their adoption journey. Until then, these families will be able to take advantage of all our services and professional support, as always.

Over the course of 20 years, Chaba Adoption is proud to have accompanied many families on their adoption journey. Each of the children, who have come from the land of smiles, has been an extraordinary success for us, of which we will cherish all the unforgettable memories.

We would like to reaffirm our absolute commitment to following the families still under contract with Chaba Adoption Agency. We thank you for the trust you have placed in us.

Best wishes to all of our Chaba Adoption families.
